

The Benefits of Luxurious Silk

Besides its luxurious softness and lustrous beauty, there are many benefits of silk that other fabrics simply cannot match, whether natural or man-made.

- Silk is the most hypoallergenic of all fabrics because of its natural protein structure.
- An all-climate fabric, silk outperforms other fabrics in both summer and winter.
 - ✿ Its natural temperature-regulating properties give silk the paradoxical ability to cool and warm simultaneously.
 - ✿ Silk is warm and cozy in winter and comfortably cool when temperatures rise.
 - ✿ Silk shawls worn as a second layer warm without being bulky.

Background

Since 2005, His Holiness Gayuna Cealo and many Direct Action volunteers have supported the hand-woven silk village project in Cambodia. By supporting the silk village project, we experience great joy from joining Cealo's works of compassion and we get to share the love the silk weavers give to their craft. It is truly beautiful, hand-woven-work we support.

With guidance from the Hope of Cambodia (NGO) and Shien Tokyo, technical guidance is given to the weavers to revive traditional silk making techniques. Working together, we serve each other including the village people and our team members who are working at Cealo's Direct Action Center in Cambodia in the process. Ultimately, the silk village project supports the self-sufficiency of the silk village. We would like to keep moving forward and we hope you will join us in the weaving of hearts all over the world through the silk village project. If you would like to support this Direct Action campaign through distributing silk shawls or other methods, **please call Lisa at 301-399-8460.**

All donations for our silk shawls go to His Holiness Gayuna Cealo's works of compassion through the Foundation for Global Harmony, U.S.A. 501(c)3.

In love and gratitude,

Cealo-team volunteers and S.L.P., Cambodian Silk Village Support Project Team of Global Heart Space, Hiroshima, Japan.
